

Single-Hung Single - Slider

Single tilt windows that marry a world of quality features.

These durable and high performance windows combine traditional beauty with charm. The clean trim lines and rich styling complements both contemporary and traditional style homes and are an economical way to add beauty and durability to your home.

The single operator and half screen provide a traditional look while its tilting feature compliments a more modern design. Operating and cleaning is effortless and simple. The weight regulated balances allow the bottom sash to open and tilt easily while the other sash remains fixed. Its triple fin-type weather-stripping provides continuous contact to its frame members to ensure maximum protection.

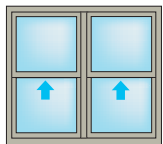

Simple and easy to clean, the single tilt window is a high quality choice. By itself, mulled together, or combined with fixed units, the combination choices are endless. All Alton windows are designed to offer energy efficiency durability and affordability with many years of trouble free performance. Traditional style together with a the tilt feature that simplifies cleaning makes it easy to understand why the single tilt window is the right choice.
